Index	25

Chapter 1

Namespace Index

1.1 Package List

Here are the packages with brief descriptions (if available):

TLE	7
TLE.Filters	7
UI	7
UI.Marks	7
UI.SatelliteFilter	8
Utilities	8

Chapter 2

Hierarchical Index

2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

Utilities.EarthParametrs	11
Filter	11
SatelliteCompositeHideFilter	16
SatelliteHideFilter	18
Logger	12
UI.Marks.MarkImages.MarkImage	13
MarkSer	14
MarksSer	14
Utilities.MedianFilterVector3	14
MonoBehaviour	
ActiveToggle	9
EciPositionable	11
Mark	12
Satellite	15
test	22
MarkGenerat	13
PlacementController	15
SatelliteGenerator	18
SatelliteInfo	19
SatelliteInfoController	20
ShowMarkinfoOnClick	21
TimeManager	22
UI.DownloadController	10
UI.Marks.MarkImages	13
UI.SatelliteFilter.SatelliteFilterName	17
UI.SatelliteFilter.SatelliteFilterType	18
Utilities.ARCalibrating	10
Utilities.ApplicationController	9
Utilities.PositionFixer	15
Utilities.SyncCameraMovement	21
SatelliteSer	20
SatelliteSerArray	21
SatellitesSer	21
TLE.Tle	23
TLE.TleLoader	23
SatelliteGenerator.TleSource	24
TLE.WebParser	24

Chapter 3

Class Index

3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

ActiveToggle	9
Utilities.ApplicationController	9
Utilities.ARCalibrating	10
UI.DownloadController	10
Utilities.EarthParams	11
EciPositionable	11
Filter	11
Logger	12
Mark	12
MarkGenerat	13
UI.Marks.MarkImages.MarkImage	13
UI.Marks.MarkImages	13
MarkSer	14
MarksSer	14
Utilities.MedianFilterVector3	14
PlacementController	15
Utilities.PositionFixer	15
Satellite	15
SatelliteCompositeHideFilter	16
UI.SatelliteFilter.SatelliteFilterName	17
UI.SatelliteFilter.SatelliteFilterType	18
SatelliteGenerator	18
SatelliteHideFilter	18
SatelliteInfo	19
SatelliteInfoController	20
SatelliteSer	20
SatelliteSerArray	21
SatellitesSer	21
ShowMarkinfoOnClick	21
Utilities.SyncCameraMovement	21
test	22
TimeManager	22
TLE.Tle	23
TLE.TleLoader	23
SatelliteGenerator.TleSource	24
TLE.WebParser	24

Chapter 4

Namespace Documentation

4.1 TLE Namespace Reference

Classes

- class [Tle](#)
- class [TleLoader](#)
- class [WebParser](#)

4.2 TLE.Filters Namespace Reference

Enumerations

- enum **SatelliteType** {
 NULL = -1 , **CUBESAT** = 1 , **TOP100** = 2 , **STARLINK** = 3 ,
 LAST30DAYS = 4 , **WEATHER** = 5 , **Geosynchronous** = 6 , **SPECIFIC** = 7 }

4.3 UI Namespace Reference

Classes

- class [DownloadController](#)

4.4 UI.Marks Namespace Reference

Classes

- class [MarkImages](#)

4.5 UI.SatelliteFilter Namespace Reference

Classes

- class [SatelliteFilterName](#)
- class [SatelliteFilterType](#)

4.6 Utilities Namespace Reference

Classes

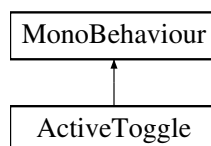

- class [ApplicationController](#)
- class [ARCalibrating](#)
- class [EarthParameters](#)
- class [MedianFilterVector3](#)
- class [PositionFixer](#)
- class [SyncCameraMovement](#)

Chapter 5

Class Documentation

5.1 ActiveToggle Class Reference

Inheritance diagram for ActiveToggle:

Public Member Functions

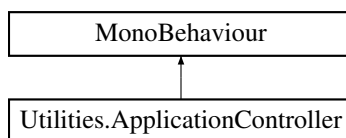

- void **ToggleActive** ()

The documentation for this class was generated from the following file:

- Scripts/UI/ActiveToggle.cs

5.2 Utilities.ApplicationController Class Reference

Inheritance diagram for Utilities.ApplicationController:

Public Member Functions

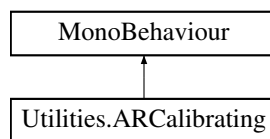

- void **Quit** ()

The documentation for this class was generated from the following file:

- Scripts/Utilities/ApplicationController.cs

5.3 Utilities.ARCalibrating Class Reference

Inheritance diagram for Utilities.ARCalibrating:

Public Member Functions

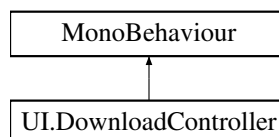

- void **SetXRotation** (float value)
- void **SetYRotation** (float value)
- void **SetZRotation** (float value)

The documentation for this class was generated from the following file:

- Scripts/Utilities/ARCalibrating.cs

5.4 UI.DownloadController Class Reference

Inheritance diagram for UI.DownloadController:

Public Member Functions

- void **ChangeText** (string text)
- void **OnDownloadError** ()
- void **OnStopDownload** ()

The documentation for this class was generated from the following file:

- Scripts/UI/DownloadController.cs

5.5 Utilities.EarthParametrs Class Reference

Static Public Member Functions

- static float **RealToVirtualDistance** (float distance)

Static Public Attributes

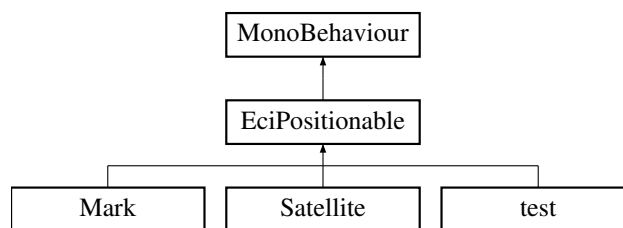

- const float **VirtualEarthRadius** = 2.1f
- const float **RealEarthRadius** = 6378f

The documentation for this class was generated from the following file:

- Scripts/Utilities/EarthParametrs.cs

5.6 EciPositionable Class Reference

Inheritance diagram for EciPositionable:

Public Member Functions

- void **SetPosition** (float x, float y, float z)
- void **SetPosition** (Vector3 position)

Static Public Member Functions

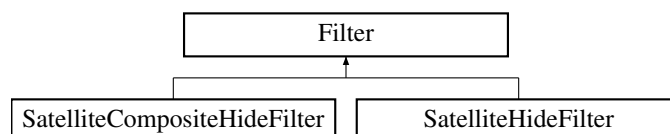

- static Vector3 **FromLongLat** (float longitude, float latitude, float radius)

The documentation for this class was generated from the following file:

- Scripts/EciPositionable.cs

5.7 Filter Interface Reference

Inheritance diagram for Filter:

Public Member Functions

- bool **ShouldShowSatellite** ([Satellite](#) satellite)

Static Public Member Functions

- static [Filter](#) **operator&** ([Filter](#) a, [Filter](#) b)

The documentation for this interface was generated from the following file:

- Scripts/TLE/Filters/Filter.cs

5.8 Logger Class Reference

Static Public Member Functions

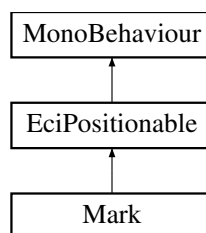

- static void **Log**< **T** > (T message)
- static void **Log**< **T** > (List< T > list)
- static void **EnableFileLogging** (string filename)

The documentation for this class was generated from the following file:

- Scripts/Logger/Logger.cs

5.9 Mark Class Reference

Inheritance diagram for Mark:

Properties

- string **Name** [get, set]
- string **Info** [get, set]

Additional Inherited Members

Public Member Functions inherited from [EciPositionable](#)

- void **SetPosition** (float x, float y, float z)
- void **SetPosition** (Vector3 position)

Static Public Member Functions inherited from [EciPositionable](#)

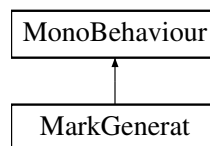

- static Vector3 **FromLongLat** (float longitude, float latitude, float radius)

The documentation for this class was generated from the following file:

- Scripts/Marks/Mark.cs

5.10 MarkGenerat Class Reference

Inheritance diagram for MarkGenerat:

Public Attributes

- TextAsset **jsonFile**

The documentation for this class was generated from the following file:

- Scripts/Marks/MarkGenerator/MarkGenerator.cs

5.11 UI.Marks.MarkImages.MarkImage Struct Reference

Public Attributes

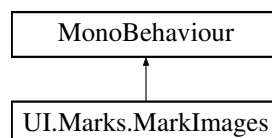

- string **MarkName**
- Sprite **MarkImageSprite**

The documentation for this struct was generated from the following file:

- Scripts/UI/Marks/MarkImages.cs

5.12 UI.Marks.MarkImages Class Reference

Inheritance diagram for UI.Marks.MarkImages:

Classes

- struct [MarkImage](#)

Public Member Functions

- void **SetMarkImage** (string markName)

The documentation for this class was generated from the following file:

- Scripts/UI/Marks/MarkImages.cs

5.13 MarkSer Class Reference

Public Attributes

- string **name**
- string **info**
- float **longitude**
- float **latitude**

The documentation for this class was generated from the following file:

- Scripts/Marks/MarkGenerator/MarkSer.cs

5.14 MarksSer Class Reference

Public Attributes

- [MarkSer](#)[] **marks**

The documentation for this class was generated from the following file:

- Scripts/Marks/MarkGenerator/MarksSer.cs

5.15 Utilities.MedianFilterVector3 Class Reference

Public Member Functions

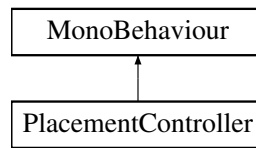

- Vector3 **Filter** (Vector3 value, float maxDelta, int windowSize=5)

The documentation for this class was generated from the following file:

- Scripts/Utilities/MedianFilter.cs

5.16 PlacementController Class Reference

Inheritance diagram for PlacementController:

Public Member Functions

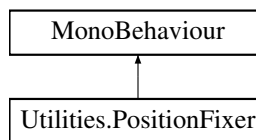

- void **ExitMode** ()
- void **QrMode** ()
- void **GlobusMode** ()

The documentation for this class was generated from the following file:

- Scripts/PlacementController.cs

5.17 Utilities.PositionFixer Class Reference

Inheritance diagram for Utilities.PositionFixer:

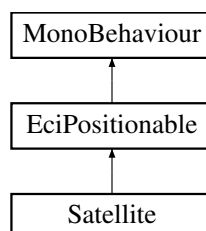

The documentation for this class was generated from the following file:

- Scripts/Utilities/PositionFixer.cs

5.18 Satellite Class Reference

Inheritance diagram for Satellite:

Public Member Functions

- Coordinate **GetPosition** (EpochTime time=null)
- void **OnHide** ([Filter](#) filter)
- int **GetMinutesForNextPass** ()
- float **GetHeight** ()
- void **UpdatePosition** ()

Public Member Functions inherited from [EciPositionable](#)

- void **SetPosition** (float x, float y, float z)
- void **SetPosition** (Vector3 position)

Public Attributes

- String **Name**

Properties

- Tle **TLE** [get, set]
- EpochTime **timeForSatellite** [get, set]
- SatelliteType **SatelliteType** [get, set]

Additional Inherited Members

Static Public Member Functions inherited from [EciPositionable](#)

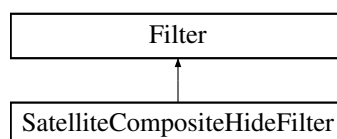

- static Vector3 **FromLongLat** (float longitude, float latitude, float radius)

The documentation for this class was generated from the following file:

- Scripts/TLE/Satellite.cs

5.19 SatelliteCompositeHideFilter Class Reference

Inheritance diagram for SatelliteCompositeHideFilter:

Public Member Functions

- **SatelliteCompositeHideFilter** (List< [SatelliteHideFilter](#) > andFilters=null)
- bool **ShouldShowSatellite** ([Satellite](#) satellite)
- void **ClearAllFilters** ()
- override string **ToString** ()
- List< [SatelliteHideFilter](#) > **GetFilters** ()

Static Public Member Functions

- static [SatelliteCompositeHideFilter](#) **operator&** ([SatelliteCompositeHideFilter](#) a, [SatelliteHideFilter](#) b)
- static [SatelliteCompositeHideFilter](#) **operator&** ([SatelliteCompositeHideFilter](#) a, [SatelliteCompositeHideFilter](#) b)
- static [SatelliteCompositeHideFilter](#) **operator-** ([SatelliteCompositeHideFilter](#) a, [SatelliteHideFilter](#) b)

Static Public Member Functions inherited from [Filter](#)

- static [Filter](#) **operator&** ([Filter](#) a, [Filter](#) b)

5.19.1 Member Function Documentation**5.19.1.1 ShouldShowSatellite()**

```
bool SatelliteCompositeHideFilter.ShouldShowSatellite (
    Satellite satellite)
```

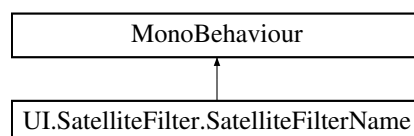

Implements [Filter](#).

The documentation for this class was generated from the following file:

- Scripts/TLE/Filters/SatelliteCompositeHideFilter.cs

5.20 UI.SatelliteFilter.SatelliteFilterName Class Reference

Inheritance diagram for UI.SatelliteFilter.SatelliteFilterName:

**Public Member Functions**

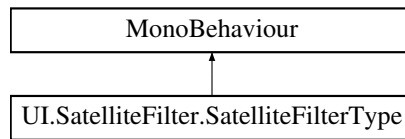

- void **ApplySearch** ()

The documentation for this class was generated from the following file:

- Scripts/UI/SatelliteFilter/SatelliteFilterName.cs

5.21 UI.SatelliteFilter.SatelliteFilterType Class Reference

Inheritance diagram for UI.SatelliteFilter.SatelliteFilterType:

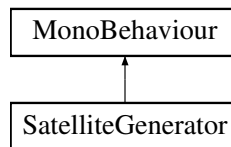

The documentation for this class was generated from the following file:

- Scripts/UI/SatelliteFilter/SatelliteFilterType.cs

5.22 SatelliteGenerator Class Reference

Inheritance diagram for SatelliteGenerator:

Classes

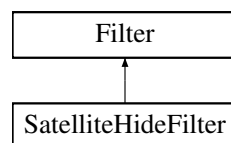

- class [TileSource](#)

The documentation for this class was generated from the following file:

- Scripts/TLE/SatelliteGenerator.cs

5.23 SatelliteHideFilter Class Reference

Inheritance diagram for SatelliteHideFilter:

Public Member Functions

- **SatelliteHideFilter** (int? minYearFilter=null, string nameFilter=null, string noradID=null, SatelliteType satelliteType=SatelliteType.NULL)
- bool **ShouldShowSatellite** (Satellite satellite)
- override string **ToString** ()
- override bool **Equals** (object obj)
- override int **GetHashCode** ()

Static Public Member Functions

- static **SatelliteCompositeHideFilter operator&** (SatelliteHideFilter a, SatelliteHideFilter b)

Static Public Member Functions inherited from Filter

- static **Filter operator&** (Filter a, Filter b)

5.23.1 Member Function Documentation**5.23.1.1 ShouldShowSatellite()**

```
bool SatelliteHideFilter.ShouldShowSatellite (
    Satellite satellite)
```

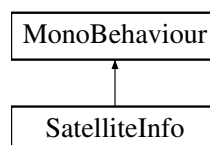

Implements [Filter](#).

The documentation for this class was generated from the following file:

- Scripts/TLE/Filters/SatelliteHideFilter.cs

5.24 SatelliteInfo Class Reference

Inheritance diagram for SatelliteInfo:

**Public Member Functions**

- void **SetInfo** (Satellite satellite)
- void **Show** ()
- void **Hide** ()

Public Attributes

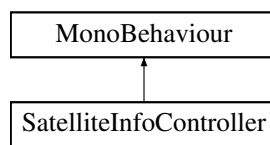

- Action **OnHide**

The documentation for this class was generated from the following file:

- Scripts/UI/SatelliteInfo.cs

5.25 SatelliteInfoController Class Reference

Inheritance diagram for SatelliteInfoController:

Public Member Functions

- bool **TryApplySatelliteFilter** ()

Public Attributes

- Action< [Filter](#) > **HideSatellites**
- [SatelliteCompositeHideFilter](#) **SatelliteHideFilters**

Static Public Attributes

- static [SatelliteInfoController](#) **Singleton**

The documentation for this class was generated from the following file:

- Scripts/TLE/Info/SatelliteInfoController.cs

5.26 SatelliteSer Class Reference

Public Attributes

- string **name**
- string **info**

The documentation for this class was generated from the following file:

- Scripts/TLE/Info/SatelliteSer.cs

5.27 SatelliteSerArray Class Reference

Public Attributes

- [SatelliteSer](#)[] **satellites**

The documentation for this class was generated from the following file:

- Scripts/TLE/Info/SatelliteSerArray.cs

5.28 SatellitesSer Class Reference

Static Public Member Functions

- static Dictionary< string, [SatelliteSer](#) > **GetSatellitesSer** (TextAsset textAsset)

Public Attributes

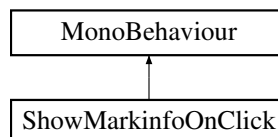

- [SatelliteSer](#)[] **satellites**

The documentation for this class was generated from the following file:

- Scripts/TLE/Info/SatelliteSerializer.cs

5.29 ShowMarkinfoOnClick Class Reference

Inheritance diagram for ShowMarkinfoOnClick:

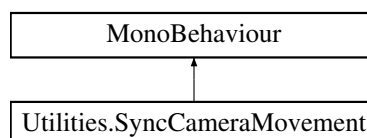

The documentation for this class was generated from the following file:

- Scripts/Marks/ShowMarkinfoOnClick.cs

5.30 Utilities.SyncCameraMovement Class Reference

Inheritance diagram for Utilities.SyncCameraMovement:

Public Attributes

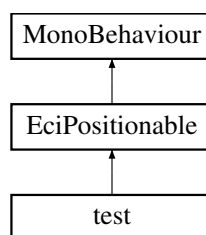

- Camera **sourceCamera**

The documentation for this class was generated from the following file:

- Scripts/Utilities/SyncCameraMovement.cs

5.31 test Class Reference

Inheritance diagram for test:

Additional Inherited Members

Public Member Functions inherited from [EciPositionable](#)

- void **SetPosition** (float x, float y, float z)
- void **SetPosition** (Vector3 position)

Static Public Member Functions inherited from [EciPositionable](#)

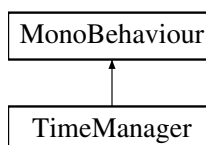

- static Vector3 **FromLongLat** (float longitude, float latitude, float radius)

The documentation for this class was generated from the following file:

- Scripts/TLE/test.cs

5.32 TimeManager Class Reference

Inheritance diagram for TimeManager:

Public Member Functions

- EpochTime **GetTime** ()
- void **SetNewVelocity** (float newVelocity)
- void **ChangeVelocity** (float valueToChange)
- void **ResetTime** ()

Public Attributes

- Action **OnMinuteChanged**

Static Public Attributes

- static [TimeManager](#) **_instance**

Properties

- static [TimeManager](#) **Instance** [get]

The documentation for this class was generated from the following file:

- Scripts/TimeManager.cs

5.33 TLE.Tle Class Reference

Public Member Functions

- **Tle** (string name, string line1, string line2)
- override string **ToString** ()

Public Attributes

- string **Name**
- string **Line1**
- string **Line2**

The documentation for this class was generated from the following file:

- Scripts/TLE/TleLoader.cs

5.34 TLE.TleLoader Class Reference

Static Public Member Functions

- static IEnumerator **GetTle** (string url, SatelliteType satelliteType, Action< List< [Tle](#) > > onLoadSuccess, Action< string > onError, bool useWeb=true)

The documentation for this class was generated from the following file:

- Scripts/TLE/TleLoader.cs

5.35 SatelliteGenerator.TleSource Class Reference

Public Member Functions

- **TleSource** (string url, GameObject prefab, SatelliteType satelliteType)

Public Attributes

- string **url**
- GameObject **prefab**
- SatelliteType **satelliteType**

The documentation for this class was generated from the following file:

- Scripts/TLE/SatelliteGenerator.cs

5.36 TLE.WebParser Class Reference

Public Member Functions

- IEnumerator **DownloadAndParseTle** (string url, Action< List< [Tle](#) > > onSuccess, Action< string > on↵
Error)

The documentation for this class was generated from the following file:

- Scripts/TLE/WebParser.cs
